## NIPPON COLUMBIA CO., LTD.

● FOR U.S.A. MODEL ONLY

# SAFETY INSTRUCTIONS

1. Read Instructions – All the safety and operating instructions should be read before the appliance is operated.
2. Retain Instructions – The safety and operating instructions should be retained for future reference.
3. Head Warnings – All warnings on the appliance and in the operating instructions should be adhered to.
4. Follow Instructions – All operating and use instructions should be followed.
5. Water and Moisture – The appliance should not be used near water – for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, and the like.
6. Carts and Stands – The appliance should be used only with a cart or stand that is recommended by the manufacturer.
- 6A. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.
7. Wall or Ceiling Mounting – The appliance should be mounted to a wall or ceiling only as recommended by the manufacturer.
8. Ventilation – The appliance should be situated so that its location or position does not interfere with its proper ventilation. For example, the appliance should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings; or, placed in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.
9. Heat – The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
10. Power Sources – The appliance should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance.
11. Grounding or Polarization – Precautions should be taken so that the grounding or polarization means of an appliance is not defeated.
12. Power-Cord Protection – Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them; paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.
14. Cleaning – The appliance should be cleaned only as recommended by the manufacturer.
15. Power Lines – An outdoor antenna should be located away from power lines.
16. Outdoor Antenna Grounding – If an outside antenna is connected to the receiver, be sure the antenna system is grounded so as to provide some protection against voltage surges and built-up static charges. Article B10 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna-discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.
17. Nonuse Periods – The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.
18. Object and Liquid Entry – Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings.
19. Damage Requiring Service – The appliance should be serviced by qualified service personnel when:
  - A. The power-supply cord or the plug has been damaged; or
  - a. Objects have fallen, or liquid has been spilled into the appliance; or
  - c. The appliance has been exposed to rain; or
  - d. The appliance does not appear to operate normally or exhibits a marked change in performance; or
  - e. The appliance has been dropped, or the enclosure damaged.
20. Servicing – The user should not attempt to service the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel.

**CAUTION**  
RISK OF ELECTRIC SHOCK  
DO NOT OPEN

**CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

● FOR U.S.A. & CANADA MODEL ONLY

## CAUTION

TO PREVENT ELECTRIC SHOCK, DO NOT USE THIS IPO-LARIZED PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

● POUR LE MODELE CANADIEN UNIQUEMENT

## ATTENTION

POUR PREVENIR LES CHOCS ELECTRIQUES, NE PAS UTILISER CE TYPE DE PLOCH POLARISE AVEC UN PROLONGATEUR, UNE PRISE DE COURANT OU UNE AUTRE SORTIE DE CORDANT, SAUF SI LES LAMES PEUVENT ETRE INSEREES A FOND SANS EN LAISSER AUCUNE PARTIE A DECOUVERT.

## DECLARATION OF CONFORMITY

We declare our sole responsibility that the product PMA-925R/725R to which this declaration relates is in conformity with the following standards:

EN5013, EN5020, EN60555-2 and EN60555-3  
Wir erklären unsere alleinige Verantwortung, daß das Produkt PMA-925R/725R auf das sich diese Erklärung bezieht, den folgenden Standards entspricht:

EN5013, EN5020, EN60555-2 und EN60555-3  
Nous déclarons sur notre seule responsabilité que l'appareil Amplificateur PMA-925R/725R auquel se réfère cette déclaration est conforme aux standards suivants:

EN5013, EN5020, EN60555-2 et EN60555-3  
Dichiaro con piena responsabilità che il prodotto amplificatore di precedenza PMA-925R/725R al quale questa dichiarazione si riferisce, è conforme alle seguenti normative:

EN5013, EN5020, EN60555-2 e EN60555-3  
Declaramos bajo nuestra única responsabilidad que el producto PMA-925R/725R, al que esta declaración hace referencia, es conforme con los siguientes estándares:

EN5013, EN5020, EN60555-2 y EN60555-3  
Wij verklaren uitsluitend op onze verantwoordelijkheid dat het product waarop deze verklaring betrekking heeft, de voorversterker PMA-925R/725R, in overeenstemming is met de volgende normen:

EN5013, EN5020, EN60555-2 en EN60555-3  
Mendeklaro inggis Neil pa apil anasar an produkten, torforstatkare/disksting PMA-925R/725R, vilan detta intyg harvarar till applyller följande standarder:

EN5013, EN5020, EN60555-2 og EN60555-3  
Declaramos sob nossa exclusiva responsabilidade que o produto pre Amplificador Principal PMA-925R/725R ao qual esta declaração corresponde, está em conformidade com as seguintes normas:

EN5013, EN5020, EN60555-2 e EN60555-3

# NOTE ON USE/HINWEISE ZUM GEBRAUCH / OBSERVATIONS RELATIVES A L'UTILISATION NOTE SULL'USO / NOTAS SOBRE EL USO / ALVORENS TE GEBRUIKEN / OBSERVERA OBSERVAÇÕES QUANTO AO USO

## NOTA:

- Mantenga siempre activado el interruptor de alimentación (POWER) en la unidad principal.
- Encienda y apague el equipo desde la unidad de control remoto.
- Cuando la unidad de control remoto no se utilice por un periodo prolongado de tiempo, desconecte el cable de alimentación.

## PRECAUTION:

Cuando son el indicador LED de silenciamiento/modo de espera (MUTE/STANDBY) se ilumina, la unidad de control remoto debe estar desactivada desde la unidad de control remoto. Conecte la alimentación desde la unidad de control remoto.

## OPMERKING:

- Zorg dat het licht van de stroomschakelaar (POWER) van het hoofdelement in de afstandsbediening stand staat.
- Schakel de stroom in uit in b.v. de afstandsbediening.
- Trek het netkabel uit wanneer u niet het toestel gebruikt gedurende een lange perio-de van niet te gebruiken.

## WAARSCHUWING:

Indien enkel de demping-/MUTE/STANDBY LED brandt, betekent dit dat de spanning niet meer aanwezig is op het apparaat. Sluit de afstandsbediening op de stroom aan.

## OBSERVA:

- Lit aliud stromibreytari (POWER) på huvudelementet vers påslagen.
- Indien enkel de demping-/MUTE/STANDBY LED brandt, betekent dit dat de spanning niet meer aanwezig is op het apparaat. Sluit de afstandsbediening op de stroom aan.
- Kopie u netkabel om apparaten niet komen in aanraking met de stroom.

## WARNING:

Om endast MUTE/STANDBY-lampen lysar betyder det att strömmen har stängts av via fjärrkontrollen. Strömmen måste då slås på via fjärrkontrollen igen.

## NOTA:

- Mantenha o interruptor de Corrente (POWER) na unidade principal sempre ligado.
- Quando o LED de silêncio/standby estiver aceso, a unidade de controle remoto deve estar desligada.
- Desconecte o fio de força quando intencionalmente não utilizar a unidade por tempo prolongado.

## CAUTION:

Se apenas o LED de silêncio/standby estiver aceso, a unidade de controle remoto deve estar desligada. Ligue a força a partir do controle remoto.

## 注意:

- 主機上的POWER (電源) 指示燈亮，就表示電源已由遙控器關閉。
- 出遙控器接電線之開和關。
- 本機打長時間不用時應將電線接線拔下。

## 注意:

若只有MUTE/STANDBY LED指示燈亮，就表示電源已由遙控器關閉。應從遙控器接電線。

## PRECAUTIONS PARA LA INSTALACION

Deje por lo menos 10 cm. de espacio entre esta unidad y cualquier otro componente situado sobre ella.

## VOORZORGSAAMTEGELIEN

Plaatsing dient een ruimte van minstens 10 cm open te laten tussen de toestel en een ander erop geplaatst component.

## FÖRSIKTIGHETSÅTGÄRDER VID INSTALLATIONEN

Så till ett det finns minst 10 cm mellanrum mellan apparaten och en ev. annan apparat som ställs ovanpå.

## CUIDADOS NA INSTALAÇÃO

Deixe um espaço de pelo menos 10 cm entre esta unidade e qualquer outro componente colocado acima.

## 安裝注意

本機須與其他設備間保持至少10厘米。

10cm or more  
10cm oder mehr  
10cm o più  
10cm o più  
10cm o più  
10cm o più  
10cm o più  
10cm o più

10 厘米或更多

## NOTE:

- Always keep the POWER switch on the main unit turned on.
- Turn the power on and off from the remote control unit.
- Unplug the power cord when you do not plan to use the unit for a long period of time.

## CAUTION:

If only the MUTE/STANDBY LED is lit, this means that the power is turned off from the remote control unit. Turn the power on from the remote control unit.

## HINWEIS:

- Lassen Sie den Netzschalter (POWER) am Hauptgerät stets eingeschaltet.
- Schalten Sie den Strom mit dem Fernbedienungsgerät ein-und aus.
- Trennen Sie das Netzkabel vom Netz, wenn Sie das Gerät nicht länger verwenden möchten. Schalten Sie den Strom vom Fernbedienungsgerät aus.

## VORSICHT:

Wenn nur das Stummzeichen-/Beleuchtungs-LED (MUTE/STANDBY) leuchtet, bedeutet dies, dass die Stromversorgung über die Fernbedienung unterbrochen ist. Schalten Sie den Strom vom Fernbedienungsgerät aus ein.

## REMARKUE:

- S'assurer que le commutateur d'alimentation (POWER) sur l'unité principale reste toujours dans la position active.
- Alumer et éteindre l'appareil avec la télécommande.
- Débrancher le cordon d'alimentation lorsque l'appareil ne sera pas utilisé pendant une longue période.

## ATTENTION:

Si seul le témoin (LED) de sourdine/veille (MUTE/STANDBY) est allumé, cela signifie que l'appareil est mis hors circuit par la télécommande. Allumez l'appareil avec la télécommande.

## NOTA:

- Tenere sempre l'interruttore della corrente (POWER) dell'unità principale nella posizione di attivazione.
- Accendere e spegnere l'appareil con la telecomando.
- Scendere il cavo di alimentazione quando avrete intenzione di non usare l'appareil per un lungo periodo.

## AVVERTENZE:

Se solo il LED di silenziosità/standby è illuminato, questo significa che la corrente è stata spenta con il telecomando. Riaccendere la corrente usando il telecomando.

## PRECAUTIONS FOR INSTALLATION

Leave at least 10cm of space between this unit and any other component placed above.

## SICHERHEITSSACHWAGEN BEIM EINBAU

Lassen einen Mindestabstand von 10 cm zwischen diesem Gerät und der anderen Komponente, die daraufgestellt wird.

## PRECAUTIONS D'INSTALLATION

Prévoir un espace d'au moins 10 cm entre l'unité et tout autre appareil se trouvant au-dessus.

## PRECAUTIONI PER L'INSTALLAZIONE

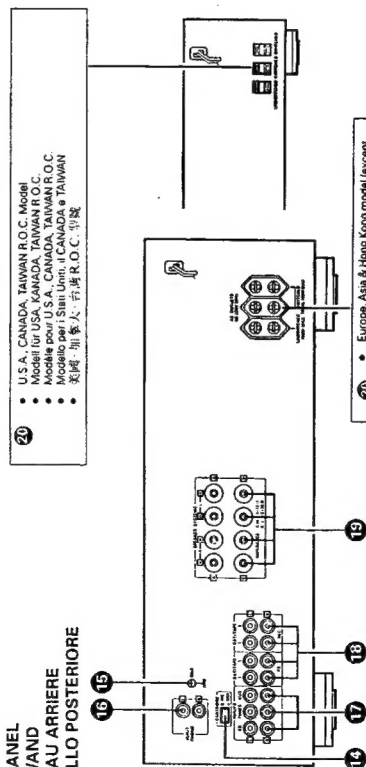

Lasciare uno spazio libero di almeno 10 cm fra quest'unità e qualsiasi altro componente che è collocato sopra la stessa.

## DESIGNATIONS AND FUNCTIONS OF PANEL CONTROLS

- 1 POWER (Power Switch)**  
When the power switch is turned ON (  ), the MUTE/STAND-BY LED  lights.  
When the power switch is turned ON, power is supplied to the unit. It takes a few seconds after the power is turned on for the unit to warm up. This is due to the built-in muting circuit that eliminates noise during the *warm-up* operation.
- 2 PHONES (Headphone Jack)**  
This jack is used to plug in the headphones.
- 3 SPEAKERS (Speaker Selection Switch)**  
The PMA-925R/725R can be connected to two speaker systems. Speaker system A and speaker system B.  
When the speaker switch is turned ON, speaker system A operates. When the speaker switch is turned OFF, speaker system B operates.  
When A and B are pressed on together, both speaker systems operate simultaneously. When the A and B switches are both off (in the out position), there is no output from the speaker terminals. This setting is used to listen to playback through the headphones.
- 4 LOUDNESS (Loudness Switch)**  
When the volume is low, it is difficult for the human ear to clearly distinguish notes in the low and high frequency ranges. The loudness switch allows a simple "one-touch" correction of this difficulty. Press the loudness switch ON (  ) when listening to music at a low volume. The low notes and high notes will be corrected to produce a natural sound.
- 5 BALANCE (Balance Control)**  
This knob is used to adjust the balance between the left and right channels. When it is set to the center position, the amplitude of the amplifier is equal on both sides. If there is a difference in the left and right channel output voltages for a cartridge, move the knob to the left and the right to adjust it. If the volume on the right side is too low, turn the knob to the right (  ). If the volume on the left side is too low, turn the knob to the left (  ). This will achieve an even balance on the left and right sides.
- 6 VOLUME (Volume Control)**  
This knob controls the overall volume level.  
Turn the knob to the right (  ) to raise the volume and to the left (  ) to lower it.
- 7 BASS (Bass Control)**  
This knob is used to control the bass quality of the sound.  
When the knob is set at the center position, the frequency characteristics are flattened in the range below 1000 Hz. The bass is emphasized as the knob is moved off center to the right (  ), and reduced as it is moved to the left (  ).  
When volume control  is set to the right of the center position, the effect of the other controls is reduced.
- 8 TREBLE (Treble Control)**  
This knob is used to control the treble quality of the sound.  
When the knob is set at the center position, the frequency characteristics are flattened in the range above 1000 Hz. The treble is emphasized as the knob is moved off center to the right (  ), and reduced as it is moved to the left (  ).  
When volume control  is set to the right of the center position, the effect of the other controls is reduced.

**13 SOURCE DIRECT (Source Direct Switch)**

The controls (BALANCE, LOUDNESS, and TONE) can be used when this switch is in the OFF (  ) position.  
When set to the ON (  ) position, the above controls are bypassed and the signals are input directly to the volume control circuit, providing high quality sound.

**14 REC OUT SELECTOR (Rec Out Select Switch)**

- Use this switch to select the recording component.
- PHONO: Used to recording from the turntable.
  - CD: Used to recording from the CD player.
  - TUNER: Used to recording from the tuner.
  - AUX: Used to recording component that connected to the AUX terminal.
  - DAT/TAPE-1  2: Used to recording from the tape deck connected to the DAT/TAPE-1 jacks.
  - DAT/TAPE-2  1: Used to recording from the tape deck connected to the DAT/TAPE-2 jacks.

**15 REMOTE SENSOR (Remote Control Sensor)**

This sensor receives the infra-red light transmitted from the wireless remote control unit.  
For remote control, point the wireless remote control unit towards the sensor.

**16 MUTE/STANDBY LED**

This LED flashes while the muting circuit is activated when the power is turned on and when muting is turned on from the remote control unit, and remains lit (without flashing) while the power is on.

**17 INPUT SELECTOR (Input Select Switch)**

Use these to select the program source.  
When the button for the desired program source is selected, its LED lights. One program source only can be selected at a time, as follows:

- PHONO: Used to select the output from a turntable that is connected to the PHONO terminal. Use the PHONO switch  (flair Panel Serial) to switch the sensitivity to correspond to the cartridge type being used.  
Used to listen a compact disc player or other component that is connected to the CD terminal.
- TUNER: Used to play a component such as an FM/AM tuner or a TV tuner that is connected to the TUNER terminal.  
Used to play a component such as a Hi-Fi video player, TV tuner, 8-track tape player or tape deck that is connected to the AUX terminal.
- AUX: Used to play a component such as a Hi-Fi video player, TV tuner, 8-track tape player or tape deck that is connected to the AUX terminal.
- DAT/TAPE-1: Use this Position when using the tape deck, etc., connected to the DAT/TAPE-1 jacks.
- DAT/TAPE-2: Use this Position when using the tape deck, etc., connected to the DAT/TAPE-2 jacks.

**18 PHONO (Cartridge Selection Switch): Rear Panel Side**

This switch is set according to the type of player cartridge to be used.

- MC (  ): Used when an MC (moving-coil) cartridge with an output of less than 0.5 mV is used.
- MM (  ): Used when an MM (moving-magnet) cartridge with an output of 2 mV or more is used.

**19 AC OUTLETS: Rear Panel Side**

- For U.S.A., Canada, and Taiwan R.O.C. models:  
AC outlets are used for connecting amplifier component units, such as tuner, turntable, tape deck, etc.
- SWITCHED (Total capacity: 120 W):  
These outlets are turned ON/OFF when main power switch and POWER button on the Remote Control Unit is turned on/off.
- UNSWITCHED (Capacity: 240 W):  
This outlet is always ON whether power switch is on or OFF.
- For Europe (except the U.K.), Asia and Hong Kong models:  
AC outlets are used for connecting amplifier component units, such as tuner, turntable, tape deck, etc.
- SWITCHED (Total capacity: 100 W):  
These outlets are turned ON/OFF when main power switch and POWER button on the Remote Control Unit is turned on/off.
- UNSWITCHED (Capacity: 100 W):  
This outlet is always ON whether power switch is on or OFF.

## OPERATION

## PREPARATION

- 1. CHECKING CONNECTIONS**
  - Make sure that all the connections are proper by referring to the back panel. (Fig. 2, 3)
  - Check the polarity (positive and negative) of connections, and the directivity of stereo separation (right cord to right channel terminal, and left cord to left channel terminal).
  - Check the directivity of pin cord connection.
- 2. SETTING OF EACH KNOB**
  - Turn the volume control knob counterclockwise, to "0".
  - Set the rotary knob to "flat".
  - Set SOURCE DIRECT and LOUDNESS to "OFF (  )".

After checking the above items, turn on the power; the amplifier is set in the ready mode in a few seconds.

## PLAYING A RECORD

1. Set the INPUT SELECTOR switch to "PHONO".
2. Operate the turntable and play the record.
3. Turn the volume and tone controls to yield an appropriate volume and sound quality.

## PLAYBACK OF CD PLAYER

1. Set the INPUT SELECTOR switch to "CD".
2. Operate the CD player.
3. Turn the volume and tone controls to yield an appropriate volume and sound quality.

## RECEPTION OF RADIO PROGRAMS

1. Set the INPUT SELECTOR switch to "TUNER".
2. Operate the tuner to receive a radio program.
3. Turn the volume and tone controls to yield an appropriate volume and sound quality.

## CONNECTIONS OF AUDIO EQUIPMENT TO AUX TERMINALS

1. Set the INPUT SELECTOR switch to "AUX" Position.
2. Operate the Audio equipment Systems.
3. Turn the volume and tone controls to yield an appropriate volume and sound quality.

## PLAYBACK WITH TAPE DECK

1. Set the INPUT SELECTOR switch to "DAT/TAPE-1" or "DAT/TAPE-2".
2. Operate the Tape Deck.
3. Turn the volume and tone controls to yield an appropriate volume and sound quality.

## RECORDING WITH TAPE DECK

1. Set the REC OUT SELECTOR to the program source you wish to record.
2. Start the playback of the program source.
3. Start recording with the component connected to "DAT/TAPE-1" or "DAT/TAPE-2".

- In the PMA-925R/725R, the REC OUT signal and the speaker headphones signal are output via separate circuits so that knobs and switches related to the tone and volume have no effect whatsoever on the sound that is recorded. Also, since the recording function is selected by the REC OUT SELECTOR, the free program source can be played through the speakers (or headphones) even during recording.

## MONITORING THE RECORDING

- A recording in progress can be monitored if a tape deck with three individual heads for recording and playback is used. A tape deck in which a common head is used for both recording and playback cannot be used to monitor recording. To monitor recording, turn the REC OUT selector to "DAT/TAPE-1" or "DAT/TAPE-2" with the INPUT SELECTOR will engage the RECORDING MONITOR and permit a check of the recording condition.

## CAUTION

## Protective Circuit

This set is equipped with a high speed protective circuit. This circuit protects the internal circuitry from damage due to large currents flowing when the speaker jacks are short-circuited. This protection circuit operates automatically in a short time after the speaker jacks are short-circuited. In such a case, be sure to turn the power to the set off and check the connections to the speakers. Then turn the power on again. After muting for several seconds, the set will operate normally.

## NOTE

- This amplifier has a full memory back-up system. When the power is turned on, INPUT SELECTOR  are set to the last mode set before the power was turned off.

## REMOTE CONTROL OPERATION

The accessory Remote Control Unit is used to control the amplifier from a convenient distance.

- (1) **Inserting the Dry Cell Batteries**
1. Remove the battery cover on the Remote Control Unit.

2. Insert two dry cell batteries as shown in the diagram on the battery supply unit.

3. Replace the battery cover.

- (2) **Directions for use**

### Note on operation

- Do not press the operating buttons on the Amplifier and the Remote Control Unit at the same time. This will cause misoperation.
- Operation of the Remote Control Unit will become less effective or erratic if the infrared Remote Control Sensor on the Amplifier is exposed to strong light or if there are obstructions between the Remote Control Unit and the sensor.
- In case you operate a VCR, TV or other components by remote control, do not operate buttons on two different remote control units at the same time. This will cause misoperation.

**Besides being able to operate the PMA-925R/725R amplifier with this Remote Control Unit, you can also operate a DENON cassette deck and CD player from this handy full-system Remote Control Unit.**

### Remote control section

#### Full-system Remote Control Unit

The full-system Remote Control Unit operates all major functions of the Amplifier, such as function switching, volume control. But that's not all! The same control pad can also control the major functions of a DENON CD player and cassette deck, and when combined with the PMA-925R/725R to create a remarkably ergonomic and versatile DENON system with all the quality sound reproduction that the devoted audiophile expects.

## Remote Control Unit RC-176 supplied with the PMA-925R/725R

### 1 POWER button

This button can be used to turn on and off the power of the amplifier. However, the power for the amplifier turned on and off if it is in the power standby mode and the power cord is plugged in.

This button will not function if there is a power failure, if the power cord is not plugged in, or when using an audio tuner.

### 2 MUTING button

Pressing this switch will activate the muting condition and no signals will be output to the speakers.

### Other buttons

Other buttons are exclusively for the PMA-925R/725R, and function in the same way as the corresponding buttons on the set.

### DECK

▶ PLAY	PLAY button
◀ PLAY (REV)	PLAY (REV) button
■ STOP	STOP button
◀◀ REW	REWIND button
▶▶ FF	FF button
● REC	Refer to the operating instructions of your DENON tape deck
■ PAUSE	A/B DECK SELECT button

### TUNER

### PRESET buttons

Press this button to move up or down among the preset station numbers.

▶ PLAY	PLAY button
■ STOP	STOP button
◀◀ REW	Reverse Track Search button
▶▶ FF	Forward Track Search button
RANDON	Refer to the operating instructions of your DENON CD player
REPEAT	Refer to the operating instructions of your DENON CD player
DISC SKIP	DISC SKIP button
■ PAUSE	PAUSE button

- The RC-176 Remote Control Unit can control CD players and cassette decks manufactured by DENON.
- Note that operation may not be possible for some models.
- Buttons are conveniently separated into groups, each group controlling one specific component. The groups are AMP, FUNCTION, CD, DECK and TUNER etc.

For details on operating other components, refer to the operating instructions for the CD player and/or cassette deck.

### CAUTION:

- If the power is turned off with the Remote Control Unit, the set is switched to the power stand-by state. If you are absent for a long period of time, unplug the power cord.
- Only the MUTE/STANDBY LED lights when in the power stand-by mode.
- You may experience erratic operation of the Remote Control Unit if it is operated in fluorescent light and direct sunlight. In particular if this light strikes the Remote Control Sensor on the Amplifier. However, this is not a malfunction, and if this should happen, simply protect the sensor against such light.

## ENGLISH

Please check to make sure the following items are included with the main unit in the carton:

- (1) Operating Instructions ..... 1
- (2) Remote Control Unit (RC-176) ..... 1
- (3) Batteries R6P (AA) ..... 2

## DEUTSCH

Bitte überprüfen Sie, ob die folgenden Teile vollständig in der Verpackung enthalten sind:

- (1) Bedienungsanleitung ..... 1
- (2) Fernbedienung (RC-176) ..... 1
- (3) Batterien vom Typ R6P (AA) ..... 2

## FRANCAIS

Veuillez contrôler que les articles suivants sont bien joints à l'appareil principal dans le carton:

- (1) Mode d'emploi ..... 1
- (2) Unité de télécommande (RC-176) ..... 1
- (3) Piles R6P (AA) ..... 2

## ITALIANO

Controllare che le parti seguenti si trovino imballate con l'apparecchio nella scatola di spedizione.

- (1) Libretto delle istruzioni ..... 1
- (2) Telecomando (RC-176) ..... 1
- (3) Batterie R6P (AA) ..... 2

## MEMO:

## 中文

下列物品應主機一起包裝於紙箱內，請查對：

- (1) 使用說明書 ..... 1
- (2) 遙控器 (RC-176) ..... 1
- (3) 電池 R6P (AA) ..... 2

## ESPAÑOL

Por favor verifique asegurándose de que los siguientes artículos son empacados en la caja pero separados de la unidad principal:

- (1) Manual de instrucciones ..... 1
- (2) Unidad de control remoto (RC-176) ..... 1
- (3) Pilas R6P (AA) ..... 2

## NEDERLANDS

Controleer of de volgende accessoires bij het hoofd toestel in de doos zijn verpakt:

- (1) Gebruiksaanwijzing ..... 1
- (2) Afstandsbediening (RC-176) ..... 1
- (3) Batterijen R6P (AA) ..... 2

## SVENSKA

Kontrollera att följande förutsett huvudapparaten, finns med i kartongen.

- (1) Bruksanvisning ..... 1
- (2) Fjärrkontroll (RC-176) ..... 1
- (3) Batterier R6P (AA) ..... 2

## PORTUGUÊS

Certifique-se de que as seguintes peças estão incluídas na embalagem fora da unidade principal:

- (1) Instruções de operação ..... 1
- (2) Unidade de controle remoto (RC-176) ..... 1
- (3) Baterias R6P (AA) ..... 2

## REMOVAL OF EACH SECTION

### ● Top Cover

- 1) Remove 4 screws (A) and 3 screws (B).
- 2) Pull up Top Cover in arrow direction.

### ● Front Panel

- 1) Remove 3 screws (C).
- 2) Remove 6 screws (D).
- 3) Detach Front Panel in arrow direction.

### ● Main Chassis

- 1) Remove 2 screws (E).
- 2) Remove 2 screws (F) securing Power Radiator with Main Chassis.
- 3) Remove 4 screws (G) securing Rear Panel with Main Chassis.

## ● Inner Panel

- 1) Remove 5 Knobs and 4 nuts.
- 2) Remove 2 screws (H) and detach Inner Panel in arrow direction.

## ● Each Unit of Inner Panel

- 1) Remove 3 screws (I), and detach LED and Switch Unit.
- 2) Remove 2 screws (J), and detach  $\mu$ -Com Unit.
- 3) Remove 2 screws (K) securing Headphone, SP Switch Unit with Inner Panel.
- 4) Remove 1 screw (L) and 1 washer, and detach Headphone, SP. switch Unit.
- 5) Remove 2 screws (M) and a Knob, then detach Power Switch Unit.

## FUNCTION OF NEW CIRCUIT

### 1. CHARACTERISTIC OF THIS CIRCUIT

The junction temperature of power amplifier output transistor always varies by an ambient temperature and music signal. Occurrence of junction temperature varying causes in change of bias current, unstable function, thus pure music signal playback is unable to do.

To maintain fixed bias current and to make pure music signal playback possible is the purpose of this circuit. This circuit holds stable bias current condition within a few seconds after turning on the power.

### 2. BLOCK DIAGRAM OF BIAS CONTROL CIRCUIT FUNCTION

As explained in Fig. 1, detects a voltage across the emitter resistors (RE) of TR1, TR2. Converts the detected voltage and comparing with the reference voltage to make the bias current value in stable state. Actually, these functions are performed by 1 chip IC.

Fig. 1

### 3. POWER SUPPLY FOR ACTUATING CONTROL CIRCUIT

Fig. 2

The circuit (IC) controlling bias current actuates by floating.

Accordingly, the power supply is also needed to be floated.

In this circuit, as indicated in Fig. 2, output is common to provide +, - power system and supplies to IC.

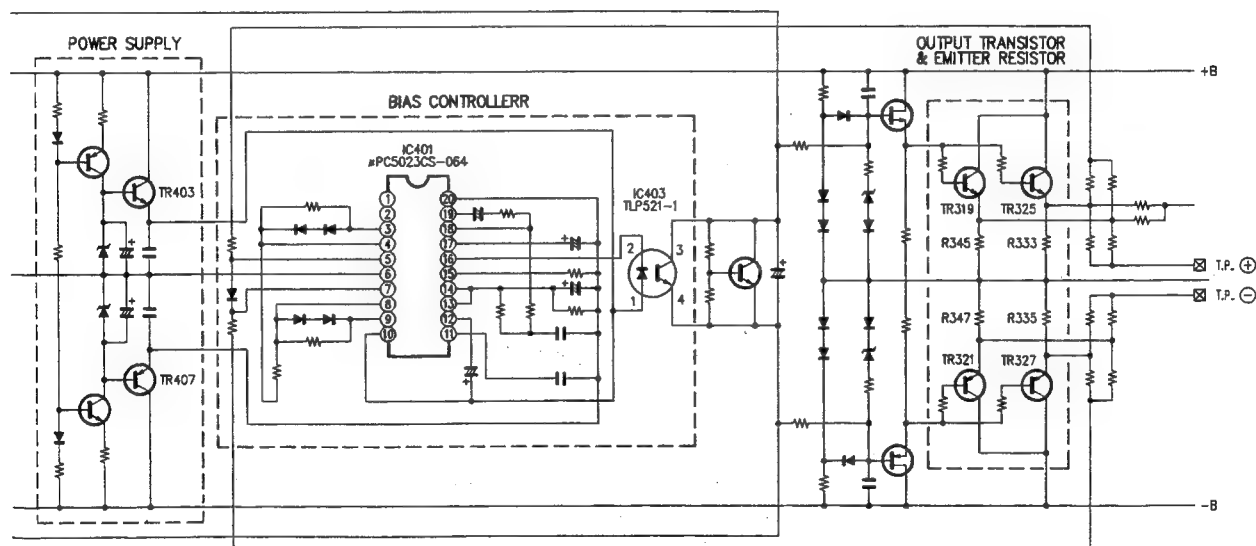

#### 4. IC DESCRIPTION ( $\mu$ PC5023CS-064)

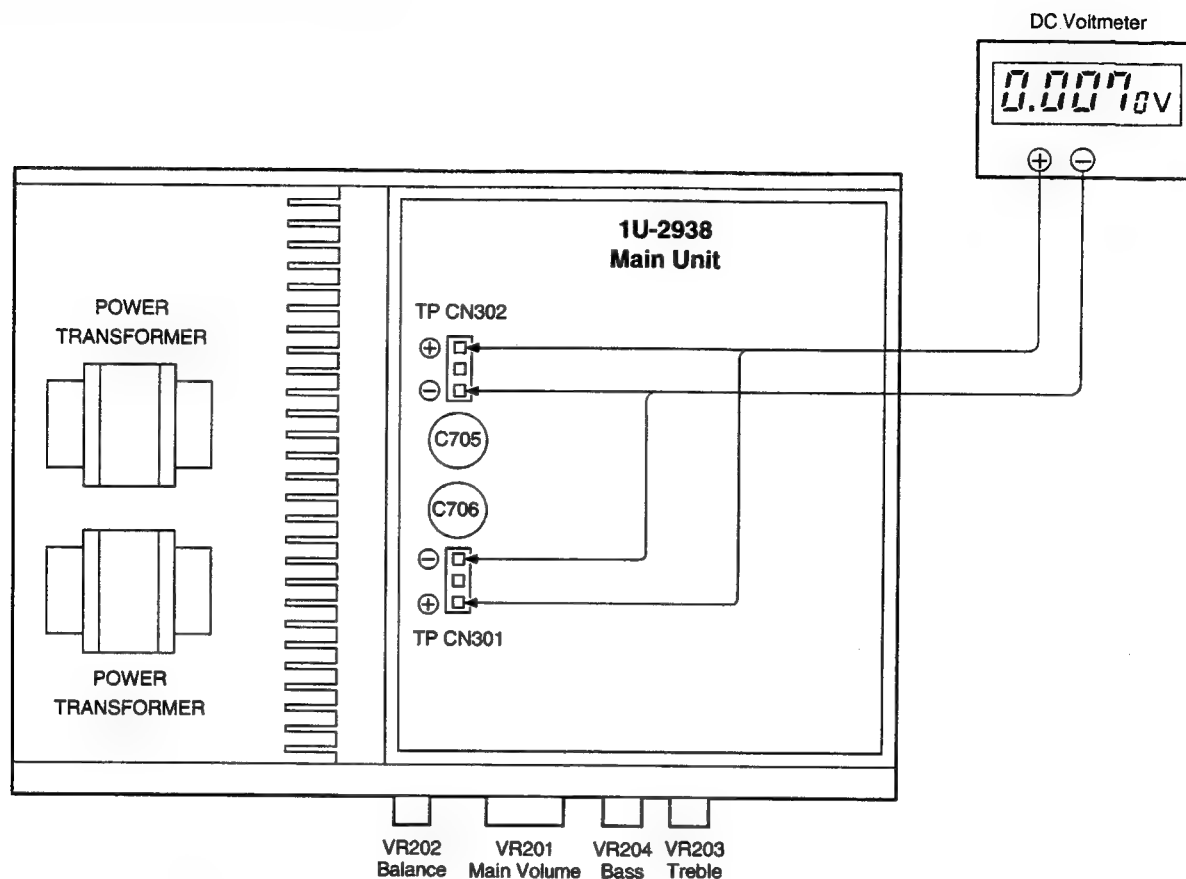

Pin. No.	Name	Contents
1	OPTI	NCP
2	OPTO	
3	NO	Comparator output
4	N-I	Comparator input (-)
5	N+I	Comparator input (+)
6	GND	Floating common
7	P+I	Comparator input (+)
8	P-I	Comparator input (-)
9	PO	Comparator output
10	V+	+ Power supply

Pin. No.	Name	Contents
11	ZDI	Control signal stabilizer input
12	ZDO	Control signal stabilizer output
13	PH-I	Peak hold input
14	PHO	Peak hold output
15	EACO	Controller gain setting
16	EA-I	Reference voltage
17	EA+I	Comparator gain setting
18	EA-1	Comparator gain setting
19	EAO	Comparator output
20	V-	- Power supply

#### 5. CIRCUIT IN THE CONCRETE

## METHOD OF ADJUSTMENTS

### IDLING CURRENT

#### ● Setup

1. Lay the unit at an ordinary position away from a direct current from a cooler or fan. Do the adjustment at a temperature between 15°C (59°F) and 30°C (86°F).
2. Set controls as follows.  
 POWER SWITCH → OFF (■)  
 VOLUME CONTROL → fully counterclockwise. (⤿) min. (Main Volume VR201)  
 (VR202, 203 and 204 are center position.)  
 SPEAKER Terminals → open: do not connect the speakers, dummy load etc.

#### ● Confirm

1. Remove Top cover. And then connect DC Voltmeter to Test points of Main Unit.
2. Connect Power cord to AC Outlet, and turn POWER Switch "on" (■).
3. 10 seconds after check to see DC Voltmeter reading is  $7 \pm 2\text{mV}$ .
4. 2 minutes after re-check DC Voltmeter for  $7 \pm 2\text{mV}$  reading.

## NOTE FOR PARTS LIST

- Part indicated with the mark "●" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "I" and "I" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.

## WARNING:

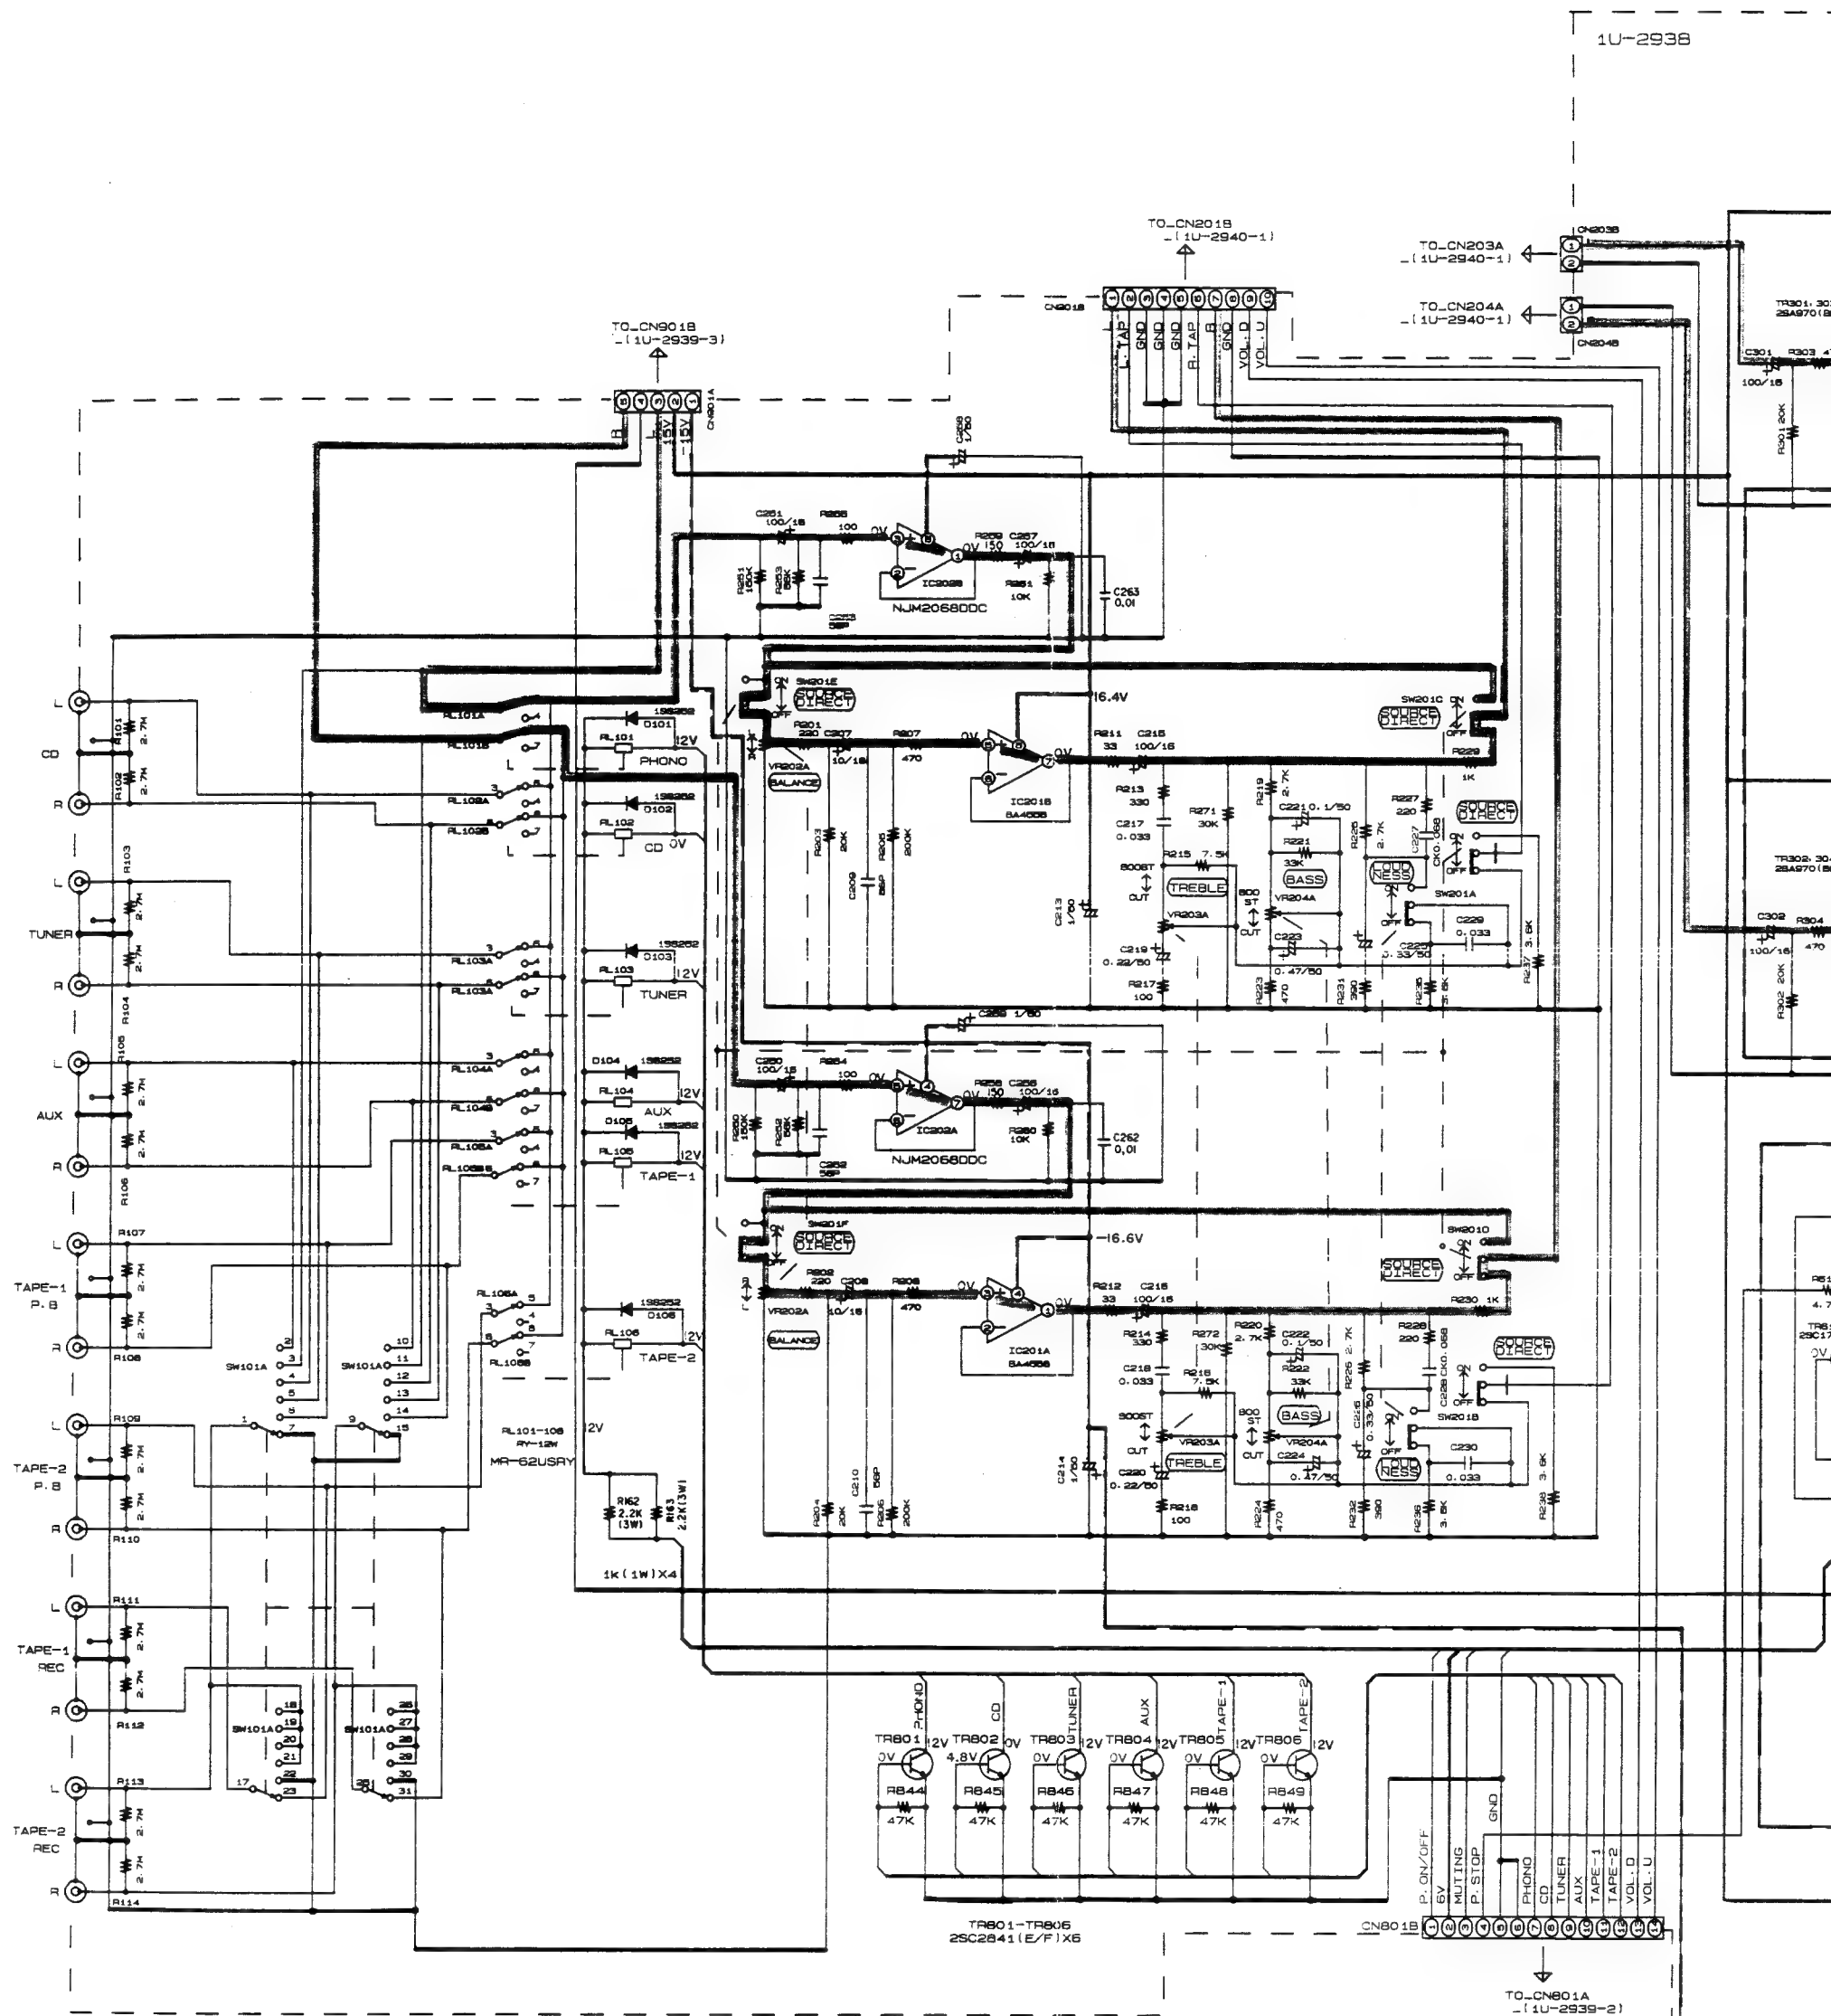

Parts marked with this symbol  have critical characteristics.  
Use ONLY replacement parts recommended by the manufacturer.

## WIRING DIAGRAM

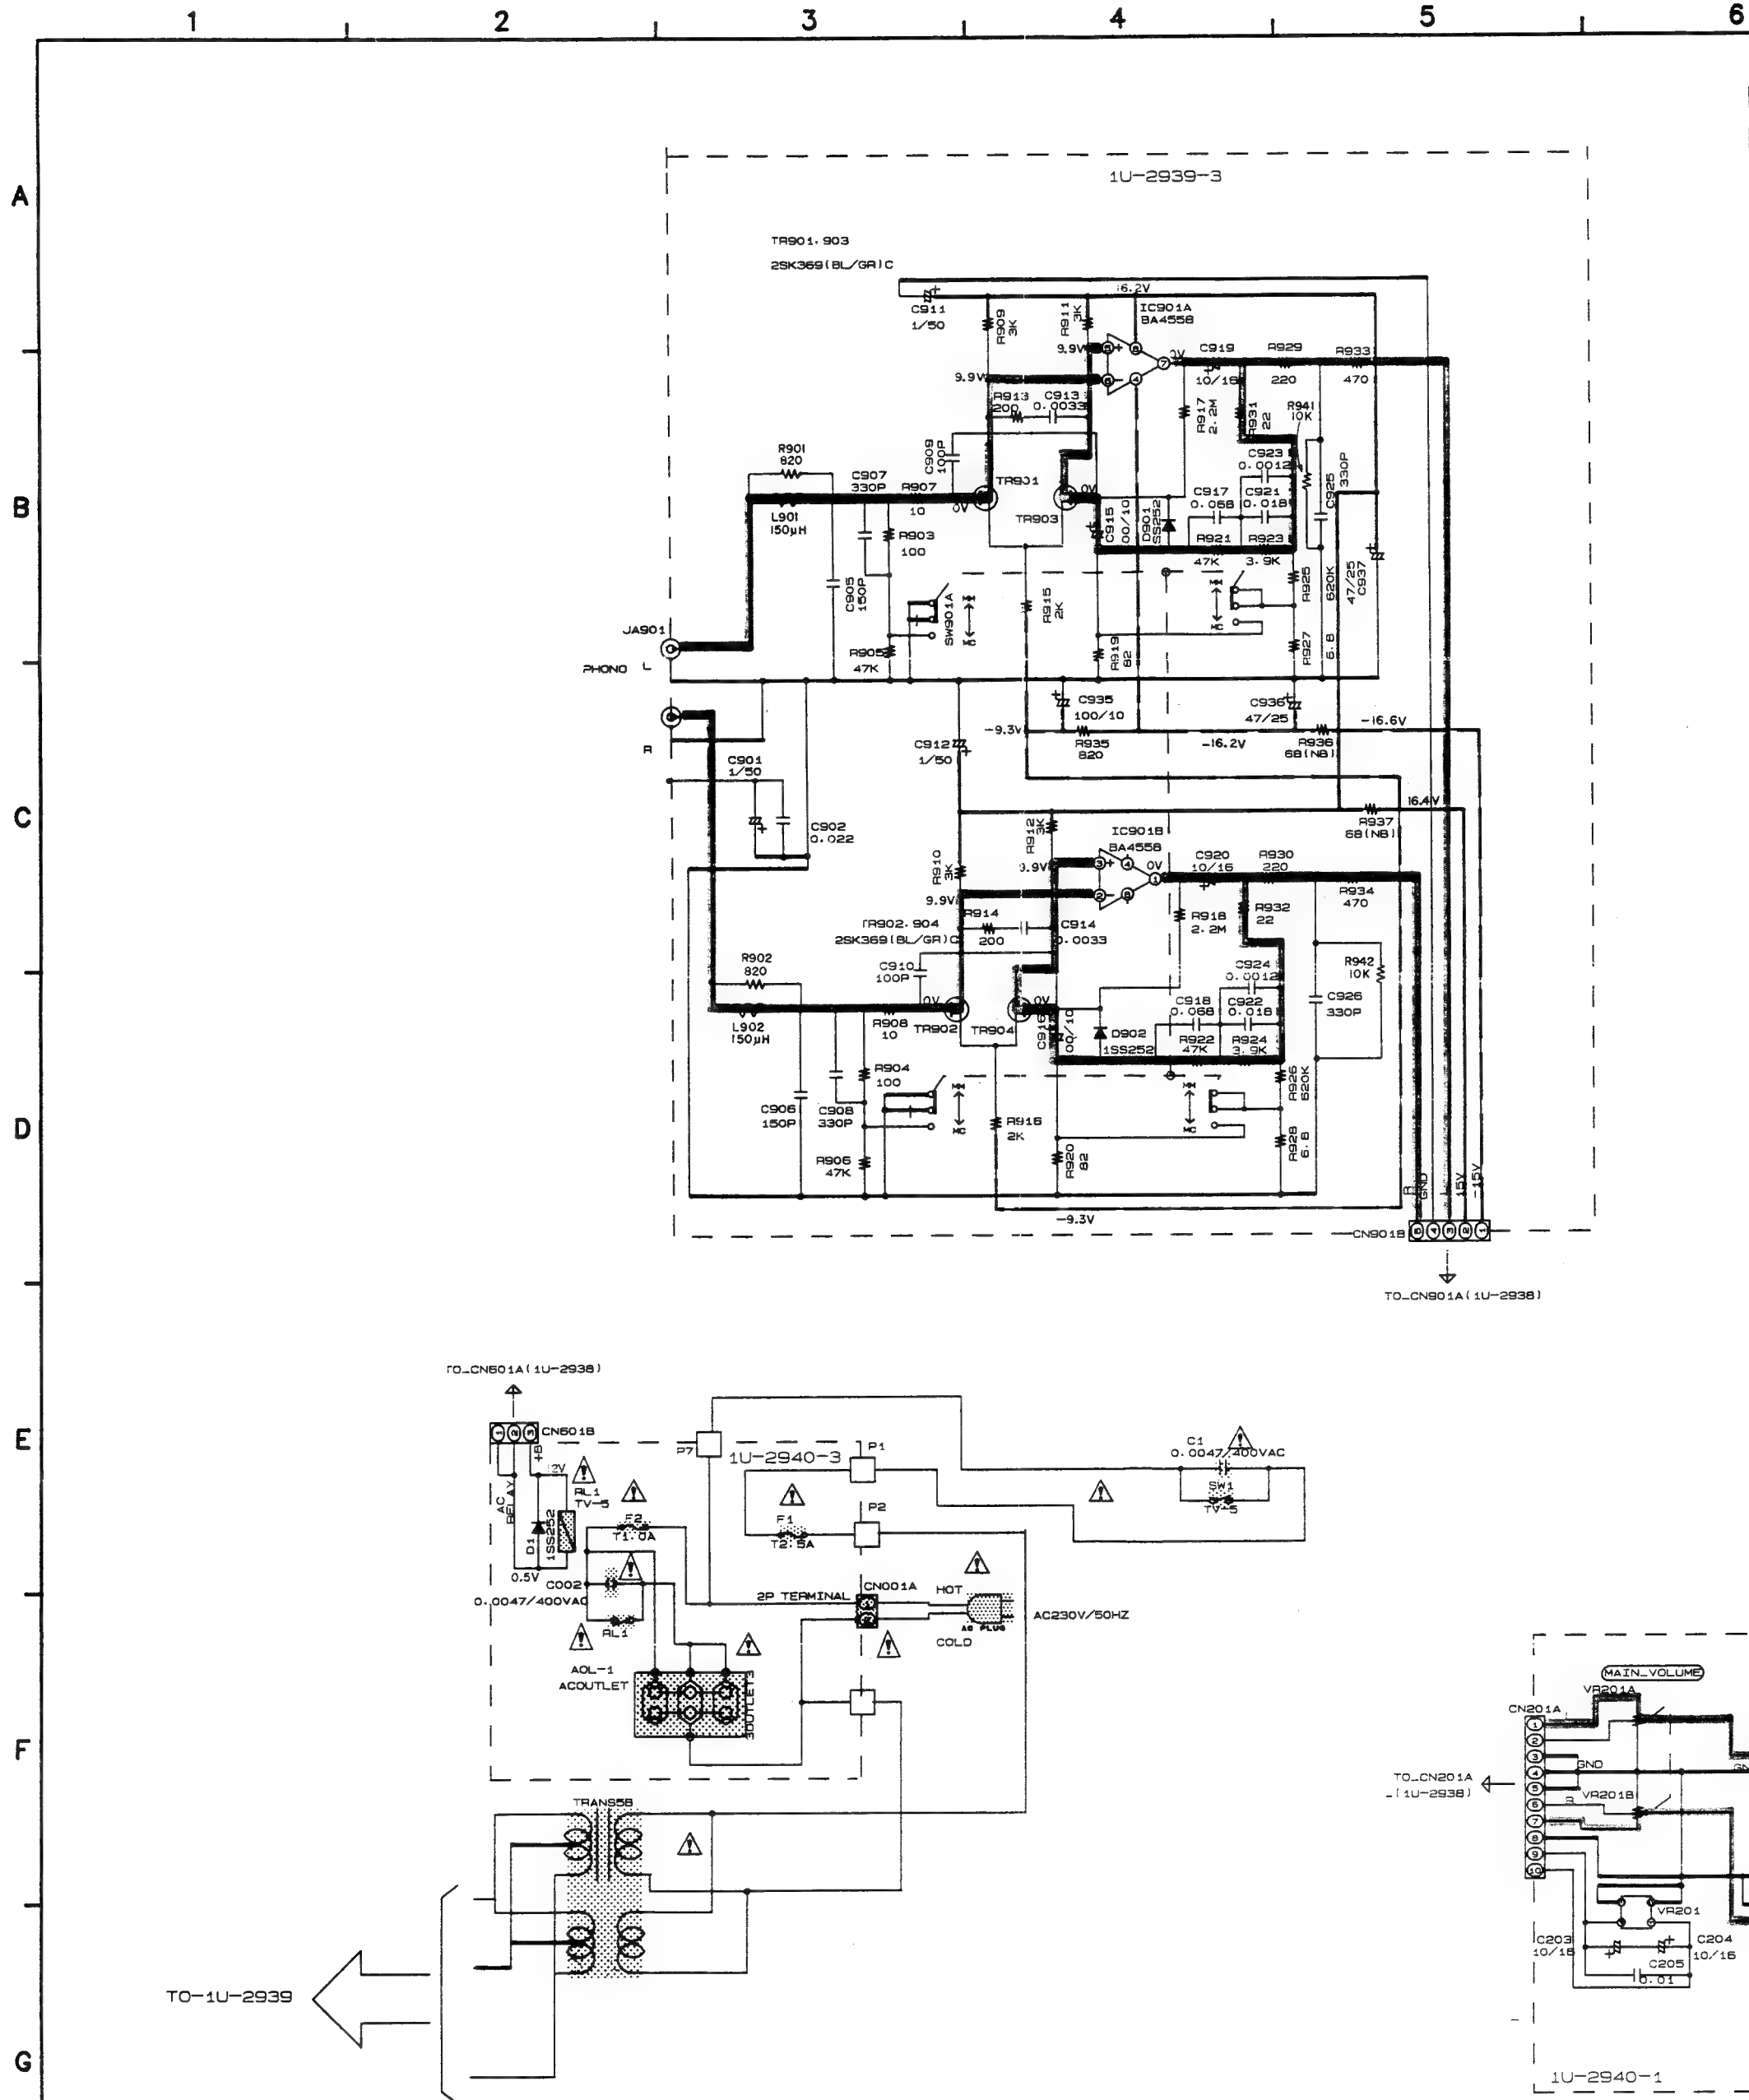

6

**WARNING:**  
DO NOT return the unit to the customer until the problem is located and corrected.

## SCHEMATIC DIAGRAM (2/4) : PMA-925R

## NOTES

ALL RESISTANCE VALUES IN OHM. K=1,000 OHM.  
M=1,000,000 OHM

ALL CAPACITANCE VALUES IN MICRO FARAD.  
P=MICRO-MICRO FARAD

EACH VOLTAGE AND CURRENT ARE MEASURED AT  
NO SIGNAL INPUT CONDITION.

CIRCUIT AND PARTS ARE SUBJECT TO CHANGE  
WITHOUT PRIOR NOTICE.

## WARNING:

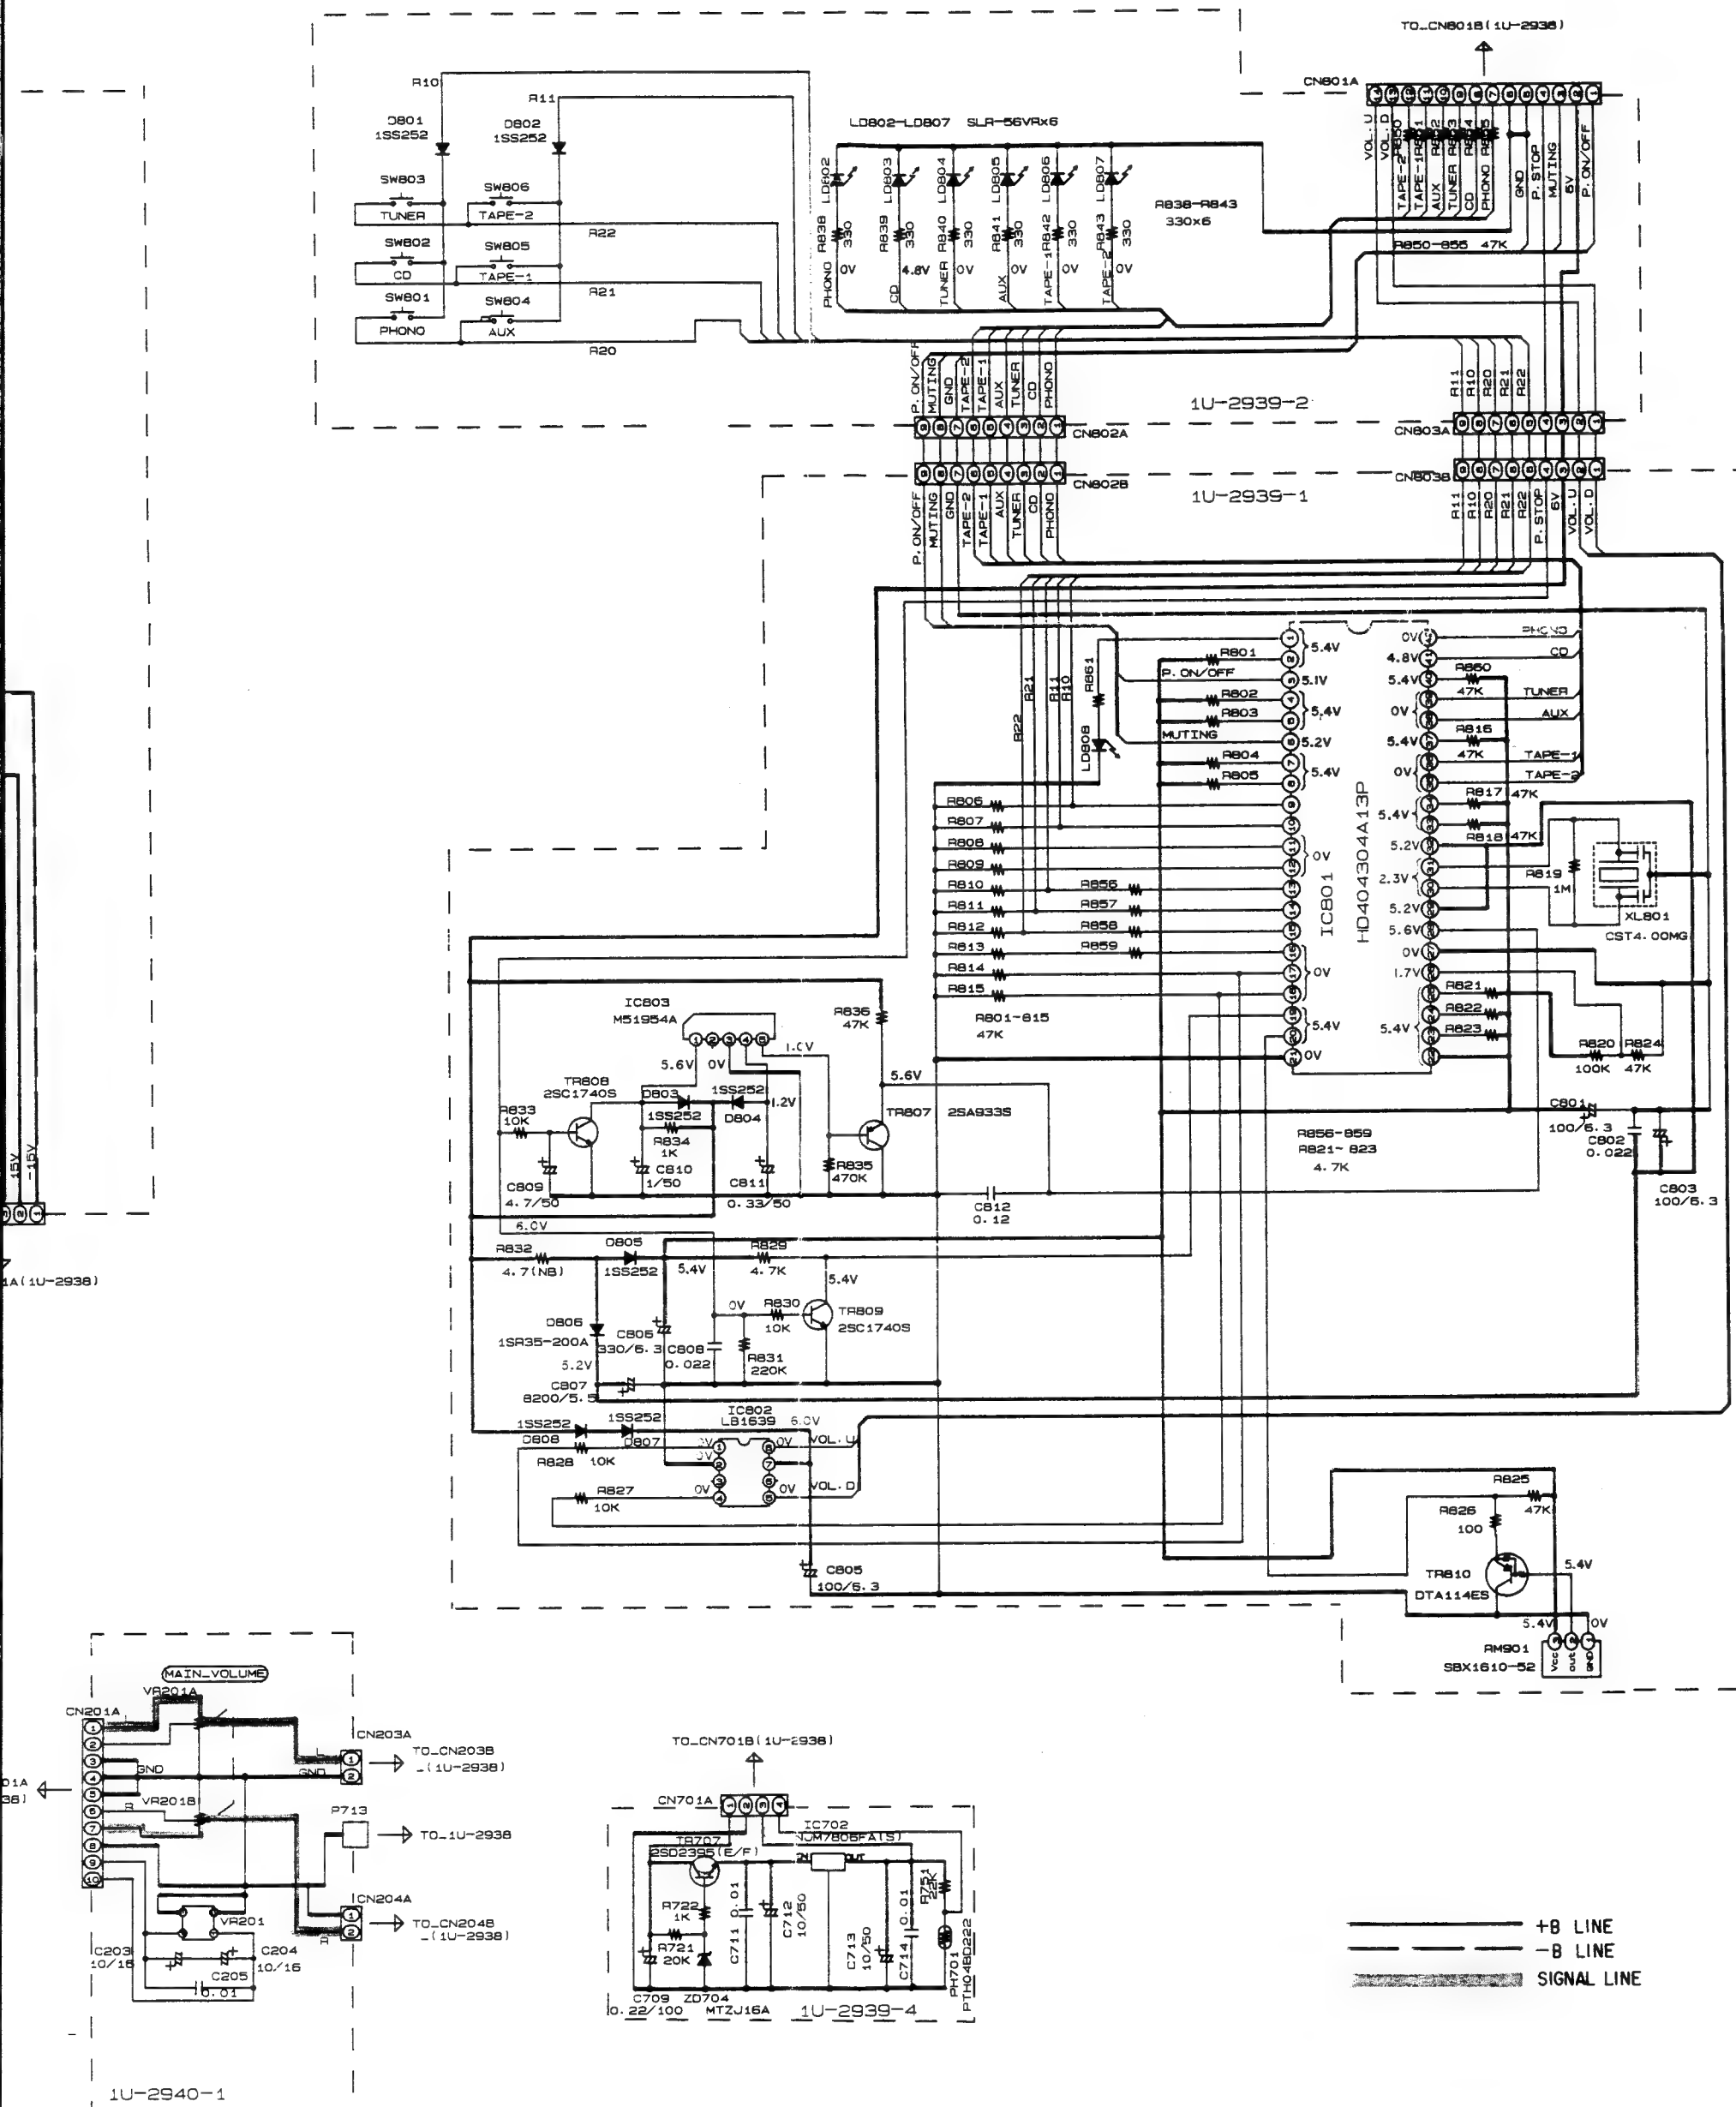

Parts marked with this symbol  have critical characteristics.  
Use ONLY replacement parts recommended by the manufacturer.

## CAUTION:

Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 milliamps, or if the resistance from chassis to either side of the power cord is less than 240 kohms, the unit is defective.

## WARNING:

DO NOT return the unit to the customer until the problem is located and corrected.
